Vendor Comments	Team Te mania progeny herd since 2009 with majority of cows sourced directly from the Te Mania stud herd. All cows are ACR recorded and data is collected throughout the life of all progeny i.e. Bwts, 200/400dwts, carcass scanning at 14 months.

Temperament	Yards	Crush	Paddock
	Docile: 70 head Quiet: 37 head	Docile: 55 head Quiet: 50 head Slightly Stirry: 2 head	Temperament not assessed in Paddock
	Very quiet weaners to handle, their temperament is a real feature of these steers. All walked through the yards easily and only the very odd steer slightly agitated in the headbail (tagged with Team Te Mania progeny test tags at assessment). They were very easy to handle as a mob after weighing and would suit the most discerning cattle person.		
Handled With	Bikes , On foot , Vehicles		

Assessor Comments	These steers are part of the Team Te Mania Progeny Test group - a progressive group of Angus producers where performance data is collected throughout the life of all progeny and the females are recorded on the ACR. This lot represents the lead draft (B-Double line), all individually weighed 312kg+ (312-378kg) to average 338kg empty at assessment - the middle draft are also being offered in this sale. Approximately 65% of the drop are by leading A.I sires (see sire links). These steers have come through the weaning process well, being feedlot/ bunker trained for 6 weeks and have been on pasture more recently. The average IMF EBV in the herd is +4.2, which is nearly double the seedstock average, which is testament to the breeding objectives targeting high-end, long fed Angus programs. Their quiet temperament is a real feature, all very quiet/ docile to handle. First class steers, some of the best in the country, they will not dissapoint.
