Assessor Comments	Vendor bred middle of the drop Gilmandyke blood weaned Angus steers. They are the progeny of a genetically large framed Gilmandyke blood herd with significant investments made for quality genetics. These steers are displaying great weight weight for age and carrying no excess fat cover and have not had a set back. The lead have already been sold at feeder weights and a tail has been retained. Health treatments have been kept up to date. They would be ideal to background having been properly weaned with compensatory weight gains immediate. 100% grass fed and antibiotic free. Top quality steers ideally weighted to hit the feeder market with weight in the spring. Alternatively they could be taken through to an export kill if required.
