Steers are well educated through the yards. They were weighed through a weigh box and some steers showed agitation in the confined space. Once steers left confined space they settle back in the mob nicely. Cattle were great to move throughout yards as a mob. Cattle are handled by experienced stockman and dogs and this showed at assessment. These steers are bred from a large herd and, typical of large mobs of cattle, had some run but easily blocked with dogs.

Handled With	Bikes , Dogs , Horses
Assessor Comments	Excellent quality line of Weaned angus steers weighed 235-320kg at assessment. Steers present very evenly as a group and carry a clean bill of health. This represents an annual sale of Bundarbo station calves. Steers stand on good bone and are all frame running on minimal feed but moving forward. They would benefit from a higher plain of nutrition and i believe there is a lot of compensatory weight gain to be had. They present in strong fresh healthy store condition and ideal cattle to take to feeder weights. Noted at assessment 5 steers with very small scarring along with light ringworm throughout mob, both not detrimental in any form. See examples.
