Vendor Comments

Offering a nice line of weaned heifers whom were bred and purchased to grow out for joining. We have decided to sell them as we are focussing on PTIC females.

	The heifers move through the yards well. They respond well to pressure and block up. Further handling and education will set them up nicely.

Assessor Comments	62 x 8-10 month old weaned Bongongo blood heifers. The heifers present very evenly as a group and represent an excellent opportunity for buyers to purchase well bred young heifers to back ground for feedlots or to grow out to trade weights. A small number of heifers exhibit a small amount of ring worm around eyes and on forehead. PM Properties selected Bongongo Blood females to align with their breeding program, however the vendor has chosen to focus on PTIC females. A very even group of young females with animal health and management a feature.
