| Assessor Comments  | Offering 110 quality unweaned steers. These weaners were 277kg live at assessment. The cattle have had a great start to life and show great weight for age. The weaners are out of majority large frame crossbred cows with quality bulls used over them to produce well bred calves. The cattle are un-weaned and will stay on their mothers until delivery. This is a good mob of calves that have not had a set back in life and are ready to power ahead to feeder weights for the purchaser. |                                                              |                                     |
