	These calves were only taken off mum the day prior to assessment, then drafted by 3 strangers. Considering that, there were a small percentage of twitchy calves that were more scared in the round yard than stirry, and a few that turned in the race when confined. Normal introduction to a new home practices should be used .

Assessor Comments	These mostly medium framed calves will be weaned for a week in small paddocks with electric boundaries and should go ahead wherever the successful buyer should send them. The calves have had all their treatments, and presented well at assessment. 1 blue eye was noted at assessment, see photo. The vendor is also offering 34 Angus and Murray Grey cross heifers and 55 Angus steers in the same catalogue.
