	These calves were only taken off mum the day prior to assessment, then drafted by 3 strangers. Considering that, there were a small percentage of twitchy calves that were more scared in the round yard than stirry, and a few that turned in the race when confined. Normal introduction to a new home practices should be used .

Assessor Comments	These mostly medium framed heifer calves will be weaned for a week in small paddocks with electric boundaries and should go ahead wherever the successful buyer should send them. The calves have had all their treatments, and presented well at assessment. These heifers should feed on as trade bodies or grow out as nice females. 2 slight blue eyes were noted at assessment, please see photos. The vendor is also offering 34 Angus and Murray Grey cross steers, and 55 Angus steers in the same catalogue.
