Assessor Comments	54 very good quality Angus x Angus cows, PTIC 4-6 months to registered Fullblood Wagyu bulls. Tremendously quiet cows, the vendor has put a lot of time into handling them and their temperament is an absolute testament to that, they flowed through the yards and crush with ease and are very quiet to get around in the paddock. These are very big framed Angus cows, they have plenty of length and depth. They are very fertile cows, they have produced calves year after year and still have good calf producing years ahead of them. They all have good, neat udders and produce plenty of milk. These cows had weaners pulled off them three weeks prior to assessment and are in great condition. Preg tested in a tight window of 4-6 months, due to start calving in September to very good registered Fullblood Wagyu bulls, MIKU Q50 and CODENWARRA SHIKIKAN N1822. A sample were mouthed and they all had strong, healthy teeth. A great herd to enter into the F1 market with or to compliment an existing program.
