Assessor Comments	A nice line of 13 angus x PTIC heifers. Heifers are preg tested in calf to an angus bull and are only on their first calf making them an asset to any breeding program as they have many years of breeding left. These cattle were purchased with the intent of joining the vendors breeding herd but due to falling out of their calving window it was decided best to move on. Heifers have been pre treated by the vendor for ease of movement into clean country.
