Vendor Comments

We have been using Rennylea Angus bulls exclusively for over 20 years. These heifers were originally classed in to be retained in the herd but due to a tight season all heifers naturally joined are now surplus to requirements.

Joining Details

Station Mated bulls put in: 24/10/2023 bulls taken out: 05/12/2023 (43 days)

Bull Breed(s): Angus

To the vendors best knowledge, this lot has had no access to bulls or stags aside from stated joining period.

Handled With	Bikes , Vehicles		
Notable Traits	Traits		
	2 Head	Cloudy Eye/Pink Eye Scarring Not Detrimental	
	4 Head	Ringworm	
	2 Head	White markings in front of flanks	
Assessor Comments	PTIC Rennylea Angus blood heifers, they are 22-23 months of age, scanned in calf to LBW Rennylea Angus bulls from 6.5-7.5 months in calf. To calve in August over a 3 weeks period. These heifers were scanned into the first joining cycle back in January and were retested 20/6/24 prior to assessment to guarantee pregnancy status. These heifers were classed in to be retained within the herd, but due to the dry season all naturally mated heifers are now surplus to requirement. They were joined to high indexing Rennylea Angus sires, with the Hearn family targeting bulls with high 400 day growth, high IMF, calving ease, and must have near perfect structure. These heifers will develop into medium/large framed matrons. The opportunity to put together 45 one mark classed in, vendor bred heifers of this quality do not come around everyday, and they will not disappoint. To be offered in 2 lots delivered run out the gate.
