Steers are typical of being freshly weaned. However were settled in yards and crush. 4 steers were faster through pound / crush, but will settle down with handling, prior to trucking.

Handled With	Bikes , On foot
Assessor Comments	A great line of USDA NOP Organic Steers. Steers show good length, bone and softness and would grow out into cracking bullocks or heavy feeders. Well bred steers, that are great to handle. Very odd steer has thrown more sleeker Brangus style or more Angus type, plus few reds/brindles. Steers will power ahead on fresh feed with no milk fat with the dry finish to summer. Please note, assessor is the vendor of these steers.
