	A well handled mob of yearling steers that worked well through all areas of the yards. Only 2 head became agitated in the crush when being weighed but settled once released. The steers were very quiet when being photographed and videoed. They are easy to move around the yards and have responded well to the comprehensive weaning process and have settled down very well.		
Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , Dogs , Horses		
Assessor Comments	Buyers here is a two deck line of soft young PCAS ELIGIBLE steers that show excellent weight for age. They have grown out very well and possess great carcass traits with depth of barrel, bone and muscling very evident in the photos and video. These have not had a set back at any stage of their life as the seasonal conditions have been great in the area since birth. These steers will suit a backgrounding operation to take through to heavy export feedlot entry weights (a few already heavy enough) or to grow out to bullock weights on grass or crop.
