Assessor Comments An outstanding uniform line of Aug/Sept 2022 drop, vendor bred PTIC Lawson Angus Blood Heifers that will commence calving for 4 wks from the 8th of Sept to the 6th of Oct. Joined to high indexing Lawson Angus Bulls specifically selected for low birth weight. These Heifers run in a large mob under rotational grazing practices and a conscious effort has been made by the vendors to keep weight and condition off these heifers, offering them at an ideal weight and condition to carry forward to calving. Heifers out of this programme have historically calved very easily and if managed correctly buyers will received similar results. An ideal proposition for a producer to add or commence the inauguration of a new herd. NB. This lot was assessed as a mob of 75 and is being offered over two lots.
