	Heifers were very good to handle in all areas of the yards and also considered quiet when moving from yard to yard. In the crush they were generally quiet even whilst being fitted with an NLIS device. Generally, the temperament is not an issue at all. Buyers should be warned however, most cattle need to be settled down on arrival after a truck trip and in strange surroundings before they are shown the bush gate.			
Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , Dogs , Horses			
Assessor Comments	Buyers a good quality line of weaner heifers best described as Composites. These heifers have been bred in light forest type country so I would anticipate excellent weight gains on better quality heavy developed scrub soil country. Vendor is a regular user of A+ and we are finding repeat buyers operating on these cattle. These heifers seem to be very content and have handled the weaning process very easily, there is no bellowing at all coming out of them. They are in plain condition so I would imagine they were in all likelihood mainly self-weaned so buyer be advised you are not buying "butter balls" that will melt once you purchase them. The vendor has had great success in the Callide Dawson Carcass Competitions over many years and are doing an excellent job breeding flatback type cattle to suit the domestic supermarket trade. Backgrounders advised to buy these and see how they go for you, guarantee you'll be back for more. Will scratch clean on farm so GUARANTEED CLEAR OF TICKS.
