Comment on Fat Score 1 Cattle

Any score 1 cows vary from store to the odd cow backward store but are certainly strong and considered fit to travel most distances. Long distance travel may require a spell. Purchaser should advise detailed instructions for delivery including desired curfew off water prior to loading.

Vendor Bred	Yes
Stock History	Vendor has been breeding Red Angus cattle for many years. Progeny are offered annually on A+ and are always popular.
Lifetime Traceable	100% of cattle in this lot are Lifetime Traceable
Bloodlines	Cows are all by IBR (Reynolds) registered Red Angus bulls. They are in calf to Anara (South Australia) Red Angus bulls.

Grazing Conditions	Traprock country with a body of dry native grass and a light cover of clover. This is country that is affected by frost in winter months. Prior to the winter the summer/autumn was a bumper season. Returned same
--------------------	---

Burr/Seed in Coat	Noted some with Bathurst and Noogoora burr in their winter coats.
-------------------	---

HGP Status	The owner declares that the cattle have not been treated with HGP at any period of their lives
Chemical Residue	Clear - No known history.
Eligibilities	Russian Eligible Saudi Eligible
J-BAS Score	6

Vendor Comments	These cows represent an annual turnoff of aged breeders.

Joining Details	Station Mated bulls put in: 05/12/2023 bulls taken out: 01/05/2024 (149 days) Bull Breed(s): Red Angus To the vendors best knowledge, this lot has had no access to bulls or stags aside from stated joining period.		
Preg Tested?	Yes, this lot was pregnancy tested, by Noel O'Dempsey (Vet) on 18/07/2024. 71 Head (100%) PTIC, from 3.5 to 8 months (at time of assessment 18/07/2024). Certificate Available.		
Pregnancy Terms	No Pregnancy Terms apply.		
Other Joining Details	68 PTIC red tags (4-8 months, vet said most 6-8 months). 3 PTIC blue tags (3.5-4 months).		
Temperament	Yards	Crush	Paddock
	Quiet: 61 head Slightly Stirry: 10 head	Quiet: 46 head Slightly Stirry: 23 head Stirry: 2 head	Temperament not assessed in Paddock
Handled With	Cows were very easy to handle in the bigger yards and appeared mostly quiet when being photographed and videoed. Quite a few were a bit difficult to handle in the race and crush and would mostly be because they had only just finished being pregnancy tested prior to assessment and they were definitely stirred up a bit from that experience. There are also a couple that possibly could become aggressive if isolated from the main mob if you enter their flight zone. Bikes , Dogs		
Notable Traits	Traits		
	9 Head Old blue eye scarring (no sight issues noticed) 2 Head Slight capped hip (no lameness) 1 Head Soft lump under the jaw		
Assessor Comments	A line of mainly medium to large framed store cows all PTIC. Cows are mainly 9.5 and 10.5 years however were not mouthed as there were no safe mouthing facilities available. I would suggest in this country that they could be in varying stages of wear. These will suit to calve out and either on-sell or take through to winter next year with a weaner calf to sell and an opportunity to fatten the cow on crop or herbage. These cows are in reasonably plain condition as they only just had big weaner calves removed at the end of May (8 weeks ago) and also run in light country so access to improved pastures or crop would see these improve in condition. The market is on the move it would seem so shop now in case it goes higher again. They are also a good straight line of single breed cows so makes them a more attractive line as a trade if required. There are also signs of some lice on these cows so they would benefit from a backliner on arrival.
