Assessor Comments	Beautiful Angus Cows PTIC only 2 weeks away from calving. Joined on the 8th of November for 8 weeks to a Kelly Angus Low-birthweight Bull. These cows are 4 years old and present in outstanding condition, averaging 830kgs at assessment. Vendor typically retains breeders in their Autumn calving operation, however due to a bull breakdown these have then been joined for a Spring calving and offered up for sale. Cows were Preg-tested in February and are due to calve from the 14th of August for 8 weeks. When selecting bulls, Vendor focuses on low birthweight, high 600 day weight, above average IMF and Eye Muscle Area. These cows are an excellent opportunity to start a quality herd or add to an existing one with a short wait for their Aug/Sept drop calf.
