	Overall these steers were good to handle. A couple of steers were unsettled when pressure was applied in the yards but once taken off they settled down. Cattle handled well through the race/crush and on the scales. These cattle have been educated to move when pressure is applied but also settle when the pressure is off.			
Handled With	Bikes , Dogs			
Assessor Comments	Excellent line of vendor bred Angus Steers. The vendor has been using the highest quality Angus genetics available in their herd with a focus on 600Day Weight & IMF. The Galimbang cattle have a history of performing exceptionally well on feed and would suit any backgrounding or finishing program. The Galimbang 2021 drop Steers Feedlot feedback MSA Index 63.65 just outside national top 10%. Provided with the right opportunity these steers will excel for the successful purchaser. Steers would normally be retained by vendor and grown into heavy feeder steers. These steers have had their 1st shot of Bovilis MH+IBR and are eligible for the feedlot Bovilis rebate. There were 16 steers noted at assessment with an old pinkeye scarring in one eye only, but still had full sight and there was a small amount of rubbing marks present on some cattle. This is the complete drop of 2023 Galimbang steers with approx 8% tail removed. Excellent opportunity to put 190 vendor bred Angus steers back together
