Handled With	Heifers handled well. They were weighed full and bought back around for pretest straight after. These heifers have been yard weaned and educated through yards well. I Do not note any temperament issues at assessment and the vendor pride themselves on Quality quiet cattle. The slightly stirry cattle in crush were only impatient from being handled twice in a few hours they settled fine when returned to mob. Bikes , Dogs , On foot , Vehicles		
Assessor Comments	64 good quality Angus x Droughtmaster/Santa heifers PTIC to Hollywood Commercial Angus Bulls. Heifers average 548kg after curfew at 21-24mths of age. Bred out of large framed Droughtmaster/Santa cows by 'Sturgess' and 'Isla' Angus bulls. All pretested 4-7mths in calf at assessment. This represents rare opportunity as these heifers are only being sold due to out of sync calving with the main herd, they would normally be retained. Please note 1hd has no tail, and 1hd has a shortened tail. Both heifers were born that way and wont hinder there ability to breed.
