Assessor Comments	Attention all buyers on offer today we have 17 Weaned Heifers. Majority of these Heifers consist of Brangus and Ultra Black bloodlines. On assessment the Heifers averaged 238kg on delivery and are showing great early growth. All Heifers have been bred in lighter ticky country however are still showing in good fresh condition. The Heifers have been treated with Cydectin LA to help with clearing of the dip. Cattle are located in the Tick area and will have to be cleared prior to moving across the tick free line, this is at the Buyers expense. Vendor does have another lot in the same sale.
