Vendor Comments

Purchased these heifers for a trade. Due to limited feed growth and other females on the point of calving they need to go to make room.

Joining Details

Not Station Mated

Other Joining Details

Unknown due to purchasing out of the saleyards but given weights and maturity it would be unlikely they are cycling.

Any Access To Bulls or Stags?	To vendor's best knowledge, this lot has had no access to bulls or stags.		
Temperament	Yards Quiet: 26 head Slightly Stirry: 2 head These heifers have had ample human interaction and were fine to handle through assessment. Yards were only portables and not the best design and the heifers flowed well.	Crush Quiet: 26 head Slightly Stirry: 2 head	Paddock Temperament not assessed in Paddock
Handled With	Bikes , On foot , Vehicles		
Notable Traits	Traits 1 Head Minor eye spot - not detrimental.		
Assessor Comments	A run of Poll Hereford and Hereford/shorthorn heifers. They are weaned, not station mated and presenting in store condition, ideal for a spring trade. They could be taken up to backgrounder or feeder weights and beyond if required. 100% grass fed and antibiotic free. Heifers were purchased with the intention of holding for the spring but the season has not allowed. They were assessed after a long overnight curfew and offer big compensatory weight gains. They are light in fat cover but healthy in the coat and haven't done it too tough suggesting they will respond quickly to a change in diet. With rain on the ground and on the forecast and the grass starting to grow they are an ideal low value trade article.
