Assessor Comments	4 Decks of Vet PTIC Angus heifers joined to Milwillah Angus bulls. These heifers were preg tested 5 months Plus in calf by Libby Harriman the Hughenden Vet & should all calve out before the end of Dec. They were identified with a full bang tail. The majority are AngusXAngus heifers with the very odd heifer showing signs of Angus Cross. They were originally bred in NSW & Southern Qld, before being purchased last year as weaners off the cow & backgorunded in western QLD. Prior to weighing these heifers had 2 solid days of handling so the assessment weights should be very much curfewed. Please note some heifers were showing signs of lice at assessment, it would be advised to treat on induction at buyers property. There are a total of 5 lots available from this vendor within this sale & all have a requested delivery date of Tuesday 27th Aug. A BIG OPPORTUNITY exists to buy reasonably price Angus breeders in calf to Angus bulls.
