	Northern bred heifers worked through the yards very well. They were handled through the back yards and worked by a novice stockman with ease. There were a few heifers that rushed up the race or felt threatened in the crush, but they instantly calmed down when back with the rest of the herd. They left the yards patiently and without any trouble.

Assessor Comments	Three decks of 72 Brahman and Brahman Cross #1 or #2 Heifers. These heifers are well-suited for the good feed in the south due to their frame, bone, and potential weight gains. They are well-bred Northern heifers and would be suitable for breeding. The heifers were VET pregnancy tested undetectable on April 8th by Anita McNamara, and have been kept in a good paddock away from bulls at Eversleigh since then. 15 of the heifers were mouthed and found to have either just broken or solid 2 or 4 teeth, with 11 being identified as 2T and 4 as 4T. 93% of these heifers are Brahman/Brahman X while 5hd being Vendor Bred do have Charolais/Santa or Droughtmaster infusion.
