Assessor Comments	A good quality line of mostly Ultrablack/Brangus cross heifers, 330 to 590 kgs to avg 486 kgs 20 hours off feed. Theses heifers are very fresh in the coat, well grown and mostly showing plenty of cover, doing particularly well on the winter herbage - see videos. PTIC by local vet 5-8 months - see preg test certificate. All heifers were joined to Carabar Angus bulls, see joining details. Note 5 head had calves weaned off them prior to assessment, they are the lighter heifers, mostly lighter in condition. I would recommend these 70 as quality replacement heifers! (Agent is happy to scan and transfer tags at no cost if required).
