Assessor Comments

A very nice Quality line of Angus composite Heifers that are PTIC to calve in February. Bred from a very good quality composite Angus Black Galloway herd that has a stud foundation. This line of Maiden heifers present a great opportunity to get in early and secure some autumn calvers that would fit into any Black herd. These heifers have plenty of frame & are soft famine types with plenty of stretch and balance. Heifers were joined over a tight 6 week period and now have pregnancy tested and are in calf to a AI son of the breed leading Landfall Newground to calve approximately from February onwards. Temperament is a stand out attribute of these young heifers, they are very quiet and easy to handle and would suit any one were quite cattle are a must !! Please see another line of 10 older PTIC females from the same vendor that 3-6 years old in this same sale .
