These heifers only get handle by one individual so they do react when strangers handle them. They have had limited handling since weaning - while being filmed and photographed they did move around at the start but then did settle well. 9 heifers moved a little and 1 heifer a lot when being weighed and exited the crush fast. 2 heifer moved a little faster than the others in the yards.

Notable Traits

	Traits
2 Head	Old pinkeye scars
5 Head	White near udder
2 Head	White up to the naval

Assessor Comments A good opportunity to purchase a line of EU Angus heifers to add into your breeding herd, or grow out to heavy feeders / kill cattle. These heifers have come through a very dry Autumn / winter but will respond quickly given the right opportunity. The heifers are just starting to respond to the green feed. They are starting to loose their old hair and a bit of old ring worm showing.
