|                    | These heifers moved very well through the yards, into the pound and in the crush. Four of them became agitated in the crush and calmed down instantly once back in the mob. They walked calmly out into their paddock after the assessment.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                   |                         |                         |

| Assessor Comments  | 96 Santa X Heifers, that have been VET PTIC to Ardrossan Angus bulls being 4 to 7 months in calf giving an expected calving of November to February. These heifers have been identified with RFID numbers and a bang tail 4 - 7 months and 5 feather bangs over 7 months. They have been sourced from excellent cow herds in Central Western Qld. This line includes 4 Baldies, 4 Greys, 3 Brindles. In addition, the vendor is also offering in the same sale, a run of 144 Angus X heifers, PTIC 4 to 7 months; 78 Angus/Santa X heifers, PTIC 2 to 5 months; and 132 Brahman heifers PTIC 2 – 5 months. They were treated with Mectec LV to treat internal & external parasites on 15/7/24. It would be appreciated to note the same-day delivery on all lots - Saturday 14th September. |                   |                         |                         |
