Vendor Comments

Bought heifers to take advantage of excess feed on our QLD block, then moved and joined to the NSW block to take advantage of the feed there before now selling. Heifers have been a pleasure to handle and have grown out well.

Assessor Comments	The heifers were purchased from the blue-ribbon sales at CTLX carcoar in 2023, with joining them in mind we purchased the heifers with Bannaby Angus blood lines from several different vendors. They have been joined to Glenavon bulls and at time of preg testing the vet has fetal sized 5 months plus, making them all reg tags. Bulls purchased were easy doing, well balanced, LBW, + rib, rump, IMF. They were moved to QLD block to utilize the feed there before being moved to the NSW block to do the same, they are currently running on exceptional feed consisting of clove, trefoil and native grasses of which the manager is monitoring and implementing procedures to control the bloat issues. Approximately 5% to 10% have old pink eye scaring, also noted approximately 3% have some white around the udder. There will be 5 lots of 50 offered and 1 lot of 49 run out the gate in this sale. Heifers have been bung tailed to identified in case they happened to get boxed up.
