**Assessor Comments**

Offering 33 X 33 Angus heifers and cows with March/April drop marked calves at foot and PTIC back to Angus sires for an Autumn 2025 calving. Calves were marked 26/08 with the bulls cut by knife (still healing) and all received a 5 in 1 vaccination and tag (18 steers and heifers). Cows were PTIC to Yundilla blood Angus sires at day of assessment from a tight 43 day joining. 3 head failed to conceive and were mothered up and removed from the line at assessment. These cows present light in condition having been on limited feed but are on the improve since arriving home from agistment and a receiving a change in diet. They have a decent frame averaging 520kg after a curfew. The calves are healthy and approaching weaning age allowing ample time to fatten their mothers pre calving, especially with the spring now upon us. Vendor is offering another run of 3 in 1 units with the same joining as this consignment in today's sale.
