Heifers were mustered in from paddock and assessed with no time to settle after mustering. Large % of heifers would push and move back and forward in race and when confined in crush were unsettled. 5 heifers were very unsettled when confined. As a mob in bigger yards heifers tended to stay mobbed up and trot/run to corners of yard away from assessor. 1 heifer was the main "ringleader". No malice was showed towards people. Not suitable for hobby farmers!!

Assessor Comments	23 good quality Angus cross heifers presenting in forward store condition that have an estimated average delivery weight of 325.8kg. Buyers a line of heifers that show great growth and weight for age, heifers have been on oats for 12 weeks and would be ideal to feed now for the domestic or export slaughter market. Heifers are Limousin infused and show the potential to grow into heavy high yielding heifers at a young age. Please note. Temperament comments. Same vendor has brother lot in this sale.
