Chemical Residue	No vaccines or parasite control treatments used.		
J-BAS Score	6		
Vendor Comments	Young steers weaned onto crop in autumn. Need to lighten numbers.		
Temperament	Store Condition		
	Store	100%	
	Yards	Crush	Paddock
	Quiet: 57 head Slightly Stirry: 5 head	Quiet: 57 head Slightly Stirry: 5 head	Quiet: 62 head
Handled With	Stock flowed through adequate facilities with no issues and worked into and up long crush onto head bale with no noticeable flighty or close quarter fear. Seen to release out of yards steadily with no trotting and no lead taking off. These cattle have been in and out of yard at least seven times since April 2024. Bikes		
Assessor Comments	Lead draft of 62 head of mixed breed steers account the breeder. Bred in a herd of mixed breed Bos Indicus females with Angus, Speckle Park, Droughtmaster, Senepole and Tuli bulls run as a continually joined herd. No vaccines or parasite control products used. Steers weaned early winter onto grazing oats and show fresh healthy condition with most stock cleaned up shiny in coat and on the do. No faults observed and majority of steers show good body type development with a few lessor type and shape observed. Majority of cattle show flat back type with a minority showing some hump. All castrated with elastrator bands. A couple of steers with warts noticed on head. Any inferior and lessor types drafted off before assessment. Scales tested ok prior to weighing and checked at finish of weighing. These cattle flowed through yard at assessing with two people and showed no noticeable temperament issues. Please refer to photos to satisfy variances in types.
