	When moving from the paddock to the yards they were content and grazed the sides of the road. Got a little quick on their feet when realizing they were cornd in the yards. Walked up the race to the scales without any push but got a little eager to get of the scales once trapped in there.

Assessor Comments	Middle draft of 60 Yearling Heifers out of 140. Well bred Heifers that have plenty of frame and stretch to grow into ideal		

future Breeders. Noted performers in backgrounding and feedlot operations with a tonne of breeding. These heifers are grass fed only and antibiotic free for any producer wishing to target that market. Heifers that have grown frame over the winter months but now need the spring feed to polish them off. Please note there are 7 heifers that do have a splash of white around the teat area. A percentage of the cattle are showing ring worm and are due for a drench with most heifers showing signs of rubbing.
