Assessor Comments	The Warra Yadin, EU Accredited heifer weaners . Due to the very tight seasonal conditions a smaller number of heifers have been retain for joining giving the successful purchaser an opportunity to secure heifers that you would not normally get a look at. An extensive range of Poll Hereford genetics have been used from AI through to Warra Yadin blood bulls . Heifers have plenty of stretch and bone but are carrying no surplus condition. A very even nice line of Heifers basically weighing 200 to 250kgs full. Noted doing cattle that have always performed well for previous buyers on grass and grain. Heifers have had all their treatments and were only drenched with D Max injectable 16 days ago so still in 42 day ESI. They are very good to handle as a large mob due to being handled at weaning. There are a few Heifers with a small old pink eye scar, but nothing active and not detrimental. Please note An opportunity to put 157 one mark Heifers together with two other lots in same sale.
