Exceptionally well mannered cattle to assess. These steers have been extensively handled throughout their lives as a result of animal health treatments & cell grazing making them very calm to handle in yards, crush & paddock. 6 steer showed some very minor anxiety in the crush with a bit of rocking and tail flicking, listed above as slightly stirry. All exited the yards at a relaxed pace, quietly made their way down the lane & were quiet as lambs to walk through for photos & videoing.
