|-----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|
| Vendor Comments | Vendor would normally carry through to heavy feeder rates but has been caught out with an increase in cow numbers and a very cold dry autumn and winter. |

| Assessor Comments  | <p>Buyers, a quality line of 90 vendor bred, Grass-fed and Antibiotic free Angus heifers, these heifers have been in a tight corner over winter and are ready to bound away if shown some warmer weather and grass. Ideal types to grow out to feedlot entry weights or put in the replacement paddock as future breeders. They carry genetics from Baringa Angus. They are being sold to make room for calving cows and a change in management direction. They will be reserved conservatively. A few heifers noted to have old pink eye scarring with one active treated on day of assessment and will be redone prior to delivery. These heifers offer great compensatory gains with plenty of quality genetics. Please note Vendor also has 62 steer brothers in the same sale.</p> |      |                          |                             |
