Assessor Comments	Buyers, a quality line of 62 vendor bred, Grass-fed and Antibiotic free Angus steers, these steers have been in a tight corner over winter and are ready to bound away if shown some warmer weather and grass. Ideal types to grow out to feedlot entry weights or go further to MSA grass fed processing weights. They carry genetics from Baringa Angus. They are being sold to make room for calving cows and a change in management direction. They will be reserved conservatively. A few steers noted to have old pink eye scarring with one active treated on day of assessment and will be redone prior to delivery. These steers offer great compensatory gains with plenty of quality genetics. Please note Vendor also has 90 heifer sisters in the same sale.
