These Steers have a tendency to run when first put in the yards. A few did not settle and were a bit stirry more trying to get

	away rather than take you on. To be fair we ran them in and started the assessing process straight away. They are Steers that are easier to handle if left to settle first. The odd one played up in the crush , nothing unusual there. 30 took a little time to settle being let out of the crush. Overall Steers that are easy handled by experienced operators.
Handled With	Bikes , Vehicles
Assessor Comments	A tidy line of well bred NSM Millah Murrah blood Steers that are going forward and are the ideal weight to finish on grain or grass.As you can see by the videos they have the frame , conformation and muscle pattern you would expect from the Millah Murrah blood lines. The breeder has selected bulls on type not price and this shows through. Two have a splash of white behind the navel. Inspections prior to sale welcome.
