	These Heifers have a tendency to run when first put in the yards. A few did not settle and were a bit stirry during processing. To be fair we ran them in and started the assessing process straight away. They are Heifers that are easier to handle if left to settle first. The odd one played up in the crush , nothing unusual there. As you can see from the videos they did settle a while after being let out of the crush. Overall Heifers that are easily handled by experienced operators.

Assessor Comments	A tidy line of well bred NSM Millah Murrah blood Heifers that are in ideal condition to join and would make for front paddock cows.As you can see by the videos they have the frame , conformation and muscle pattern you would expect from the Millah Murrah blood lines. The breeder has retained 90 Heifers in herd, the Heifers offered here is the next cut with a tail of 100 head taken out. Bulls have been selected on type not price and this shows through. The one with a splash of white on the navel that appears in the video has been taken out. A few are slightly cloudy in one eye from old pink eye infections but it is not detrimental. Inspections prior to sale welcome.
