Assessor Comments	Excellent quality line of EU Accredited Angus steers that weighed an average of 282kg (240-329kg) at assessment. The Taloo by herd carries an outstanding reputation with some of the leading feedlots for high marbling and feedlot performance. Taloo by have been using Rennyalea Angus genetics since the studs inception using only the very best genetics available. These steers are ideal to add more value on grass to become heavy feeders or target grassfed markets. Please note; four steers observed with an old eye scar which have all recovered (worst eyes were removed), 8 showing signs of ring worm (not detrimental) and a 15% tail end was removed from the line at assessment.
