Assessor Comments	On offer by the Christie family of "Corona stn" is the thrid draft of 2200 M/J drop unshorn wether lambs in todays sale. This line is made up of approximately 40% dohne/merino and 60% pure merino with a weight range of 20-35kg to average 29kg after a long curfew. These lambs are more so the later drop portion and are showing good weight gain and growth for age with a nice start in the wool and have benefitted from favorable conditions in the far west. These lambs are un-mulsed and straight out of the paddock and on fresh feed in a backgrounding scenario would grow out to trade weights or heavier given the chance with a good rebate from the wool. *Note- small percentage with some dry dag. *Vendor is also offering 3 x lots of wethers and 1 x ewe lambs in todays sale.
