Assessor Comments	440 mixed sex store lambs averaging 37.4 kg at assessment, weighed after a 12 hours wet curfew. Majority of lambs are sired by 'Coronga' White Suffolk rams with approx, 10-15% sired by Border Leicester rams. They are May/June drop and are bred from large framed 'Kerrin Poll' merino ewes that have given them a great start and are now ready to be weaned onto forward feed. Lambs show good growth for age and plenty of potential to grow into heavy export lambs given the opportunity. They have been running on native clover and herbage with this evident in the skins. They have a heavy degree of clover burr on breach, bellies and points. These framey store lambs are backed with genetics and will excel on good feed, buy with confidence.
