Vendor Comments	Annual draft of xb lambs normally grown out and sold to local processors, but due to the season they are being sold now.			
Any Access To Rams or Stags?	To vendor's best knowledge, the female portion of this lot has had no access to rams or stags.			
Assessor Comments	A good line of new season ws/mo x lambs that would suit the grazier or feedlot background. These lambs have been weighed through an auto weigher and are all 28-35kg to average 32.5kg full at assessment. They are made up of two drops, identifiable by ear tag. A/M drops (blue tag) and J/J drops (white tag). This lot is predominantly J/J drops, with there being less than 20 head of blue tags. All lambs were weaned back in July and August and are still reasonably fresh. They are good types that show good shape and depth of body. Only up for sale because of the season, but these lambs are usually grown out to heavy trade and export weights without any trouble. Please note that there are two other lots from the same vendor in this sale.
