Assessor Comments	An excellent line of strong breeding ewes that have just had their lambs weaned off when assessed. These ewes will go ahead with years of breeding in them given the right conditions. The weights and fat scores of these ewes show the incredibly tough season that they have reared a lamb though. The vendor has been investing in quality genetics for many years, and this shows with successfully shearing every 6 months and returning exceptional lambing rates. The ewes have been M/TS, scabi and annual Glanery7 B12. Not to be missed, this is a genuine line of breeders that will not disappoint. Vendor is also selling the complete line 390 of '21 drop ewes in the same sale.
