Assessor Comments	A really neat set of sire-verified and genomics-recorded HBR & APR registered spring born U females. The majority of these females are sired by AI or high performance NB Genetics bulls. They're out of easy-calving NB Genetics females, high in growth and and IMF. These females have been weaned and developed on dry pastures over winter, making them ready for spring joining this year. An opportunity not to be overlooked for the distinguished cattleman looking to put a line of high performing genetics into your Herd. Please note, 2 Heifers have very slight blight scarring in one eye each and 2 Heifers have very light old wart scarring around the head Area, all deemed not detrimental.
