Vendor Comments

These heifers represent the pregnancy tested undetectable heifers from a large contemporary herd of 850 Yearling Heifers that were put to the Bull for the 2024 joining season. Unfortunately the adverse Winter took its toll on our joining.

	A little quick through the round yard but principally handled well in the race and weigh box with the odd one nervous, good free moving cattle that are respectful of the handler					
Handled With	Bikes , On foot , Vehicles					
Assessor Comments	A very well bred line of moderate framed young Heifers that present in strong store to forward condition with bone and substance that are starting to clean up their winter coat. Well handled through yards with all vet treatments initiated early year pre-joining. These Heifers present a grand opportunity to secure a one mark line of young Females bred out of large framed Angus Matrons. All have been preg scanned undetectable from a large group of 850 heifers. All faults have been removed with the line remaining ideal to join as future breeders or fatten on grass or grain for the trade. This line represents half of a group of heifers weighed from 317-370 kg and is the lighter weight draft of a large run of Vendor Bred Heifer (Vendor has 2 lots in the catalogue). Note - observed when handling : 5 White Udders, 4 Small Wart/s (on face), 1 Blue Eye, 3 White Eyes, 1 Vaccination Site - side of neck - none of which is detrimental to the beast.
