Handled With	A very quiet line of calves to deal with. None that really stirred up in the crush. Bikes , On foot , Vehicles		
Assessor Comments	An ideal opportunity to purchase a complete drop of calves, which has had a small tail taken out the bottom end. The vendor will sell as two lines, steers and heifers. These calves have not been weaned, and will not be prior to delivery. The vendor is selling much earlier than usual, because the season is showing all the signs of closing off early. The calves will present in relatively fresh condition, and appear to be on a rising plane of nutrition. These cattle have always been very carefully managed for temperament, and that quiet temperament shows in these calves. This is a commercial mob out of the Tooperangus Black Angus stud. These heifer calves weighed 175 kg at the time of assessment, and will present in strong store condition. They have been vaccinated with 7 in 1, and Dam drenched through their mothers. An opportunity to purchase a great line of genetics to grow into a quality mob of future breeders.
