Quiet: 62 head	Quiet: 59 head Slightly Stirry: 3 head	Temperament not assessed in Paddock

Heifers were mostly good to handle in the crush and yards. Three heifers were slightly agitated while in the crush but all settled once back in the mob & remained quiet when being photographed.

Handled With	Bikes , Vehicles
Assessor Comments	A mostly good to very good quality line of vendor bred Angus and Angus x heifers. Heifers were yard weaned in several mobs from March to May 2024 and worked through the yards and educated to hay racks throughout the weaning process. Three heifers have a small amount of warts on the face & neck, not detrimental. They are all sired by Hazeldean Angus bulls with the full sire list provided. All heifers received first dose of 5 in 1 at branding from December - January & received the 2nd dose plus Ivomec backliner at weaning from March - May 2024. Heifers have not had access to grain or cotton seed and would suit to take to feeder weights for a range of high quality markets. Alternatively, the top 55% very good quality heifers could suit as future breeders.
