Quiet: 30 head	Quiet: 20 head	Temperament not assessed in

	Slightly Stirry: 15 head	Slightly Stirry: 25 head	Paddock

These heifers were quite inconsistent in their temperament during my assessment as they were a pleasure to handle when moving from pen to pen, but unfortunately did not respond overly well to pressure when drafting or weighing in the crush. Whilst taking photos & videos in a small holding paddock, they were a different animal, extremely inquisitive, quiet & strolled around with not a worry in the world. I do believe further education & persistence within a confined area would do them wonders.

	Traits
1 Head	White Markings On Udder/Flank
1 Head	White Markings/Line forward of the Navel to the briskit.

Assessor Comments: Schiavello Pty Ltd are offering a tremendous opportunity for a prospective purchaser to acquire a lovely line of well-bred Angus heifers. Sired by leading Kelly Angus genetics with an emphasis placed on true to type phenotypical attributes, high growth EBVs & carcass characteristics. These heifers have an eye-catching appeal with all of the maternal traits to grow into magnificent mature females. Although they are not directly given a PESTIGUARD vaccine, Schiavello are always on the front foot with their management practices & have had these future breeders ear notched for BVDV with all test results coming back NEGATIVE. If you are looking for an even line of females for replacements or even looking to take advantage of the current market for backgrounding, fattening or joining purposes, then look no further. Well recognized for their growing ability, there is a great opportunity to take advantage of compensatory weight gains if in the correct circumstance.
