Assessor Comments	On offer are 38 Angus feeder-weight steers. These steers have an average live weight of 349.2 kg at assessment. They are showing great weight for age, with excellent signs of shape and stretch. These steers are ideal feeder candidates; they have not experienced any setbacks and are currently being paddock-weaned onto a grazed oats crop. These steers are Hazledean bloodlines out of large-framed Angus cows. Given the opportunity, they should continue to grow into heavy export weights. These steers carry my strongest recommendation.
