	Heifers flowed well through yards and up race at assessment. Heifers were drafted, preg tested & weighed at assessment with only 2 head becoming stirry in the crush but settled as soon as they were out. Heifers are very well handled by the vendor and will compliment any breeding herd.		
Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , On foot , Vehicles		
Assessor Comments	A 3 deck line of PTIC Angus & Crossbred heifers that are joined to Angus & Belmont red bulls 4-8 months in calf. Heifers are well grown for age and present with a good to large frame relative to age & in forward store condition. This line of heifers were preg tested on 4/07/24 by Moos & Ewes contracting as seen in photos with certificate but have been re preg tested by vendor at assessment 4-8 months with the very heavy pregnant's removed. Heifers are from a very reputable line of cattle that are selected on fertility, confirmation and doing ability with this line showing all of those traits. At assessment 10 x Angus x heifers were seen with white on the underbelly & 3 x with a brindle flick through them. A very tidy line of heifers that will compliment any herd.
