Handled With	Bikes , Dogs , Horses , Vehicles							
Assessor Comments	An attractive line of Angus cross heifers with their first calves at foot. Heifers were unintentionally joined whilst on agistment , hence the breed composition of the sire of the claves at foot is subjective. Heifers have done very well since being relocated to the current property of residence, and appear to be milking well and doing a good job on their calves. Consider suitable to being incorporated in to most breeding herds. Or alternatively as a trade option. Heifers weighed from 516 to 678 at assessment, calves are estimated to be from 60 to 100kg.
